Foreword

GovCIO COMMANDLINK places situational awareness of your organization's mission into the hands of the mobile workforce. With a 360 degree view of all system activity on an edge-to-edge map display, users have the data and actions necessary to make critical decisions quickly and effectively. Whether monitoring notifications triggered by geofencing events, navigating, or tagging actions of other system assets, users and management will experience more cost-efficient operations.

Welcome to GovCIO COMMANDLINK

GovCIO COMMANDLINK mobile seamlessly integrates with GovCIO COMMANDLINK, our personnel incident and management system for command centers.

The GovCIO COMMANDLINK system provides the ability to:

Monitor

- Real-time updates of all users
- Navigate to any location or user
- Quickly toggle location sharing on or off

Identify

- Set individual and system geofencing parameters*
- Capture and upload geo-tagged pictures and video*

Inform

- Status actions via barcodes and RFID*
- In-app messaging*
- Configurable notifications*

Note

“*” - Future Release

GovCIO COMMANDLINK is a flexible and easy-to-implement personnel incident and asset management system for GPS-enabled radios. It is designed to provide situational awareness wherever mobile users are deployed, whether in vehicles or on foot. The solution provides command staff, communications specialists, and emergency operations managers with an enhanced geospatial view of resources and assets.

This document provides a quick-start procedure for GovCIO COMMANDLINK clients.
